

OEM THERMOSTATIC MIXING VALVES

quality and reliability

Introduction

Inta's OEM thermostatic mixing valves are manufactured to EN1287 and offer the same manufacturing quality and performance you've come to expect from an inta mixing valve. OEM mixing valves offer an alternative to thermostatically protecting your installation where certification is not required.

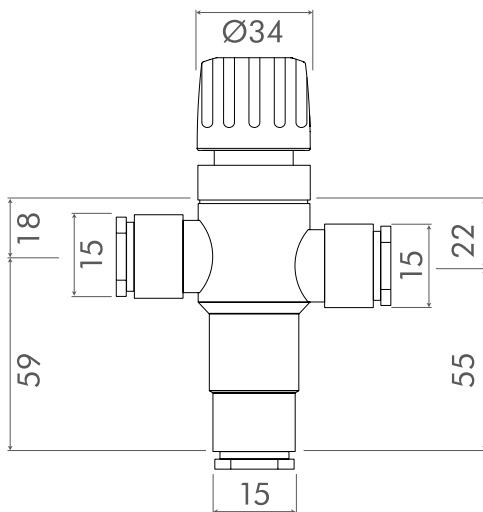

- Manufactured to EN2187
- One piece cartridge for ease of maintenance
- Simple to install
- Robust and reliable
- Off-set inlet connections
- Anti-tamper proof head

Description

Offset thermostatic mixing valve 15mm

421013CP

Dimensions

421013CP

Technical specification

Temperature range	30 - 65°C
Max. static pressure	10 bar
Max. dynamic pressure	5 bar
Max. inlet temperature	100°C
Kv	1.6m ³ /h
