## KATIE square shower head

### INSTALLATION

Before installing the shower head, flush the pipework through to remove any debris that may be in the system.

### CLEANING

Triton recommends that all products are cleaned using warm, soapy water.

DO NOT use abrasive or aggressive chemical cleaning products as this may affect the product surface and finish.

To clean the nozzles simply rub your thumb over them.

DO NOT use a pin or similar to poke the holes otherwise the efficiency of the shower spray will be impaired.

In extreme cases, remove the showerhead and leave to soak overnight in a mild proprietary descaler. Make sure all traces of scale are removed and thoroughly rinse in clean water afterwards.

IT IS IMPORTANT TO KEEP THE SPRAYHEAD CLEAN TO MAINTAIN THE PERFORMANCE OF THE SHOWER. The hardness of the water will determine the frequency of cleaning. For example, if the shower is used every day in a very hard water area, it may be necessary to clean the showerhead on a weekly basis.

Before refitting the showerhead, flush any debris out of the hose.

### INSPECTING THE HOSE

Your shower hose should be inspected from time to time for signs of damage or internal collapse.

Internal collapse can restrict the flow rate from the shower head and may cause damage to the shower, especially an electric shower.

Triton recommends use of a branded anti-twist hose on all showers to ensure continuous safe performance.

#### *To inspect your hose:*

1. Unscrew the hose from the shower head and the shower outlet.
2. Inspect the hose for damage, internal kinks, etc.
3. If necessary, replace the hose.

## REPLACEMENT

**Description**

**Part No.**

---

SQUARE CHROME SHOWERHEAD.....88500090  
(Complete assembly only)
